

# NextGen Strap Trailer CX-7MST

The CX-7MST utilizes a mid range approach in our meeting speed, efficiency, and versatility. This model allows individuals to optimize their multiple short drop applications. However, load factor maximization for long hauls can be achieved by simply instilling a little more thought and time to take advantage of all seven positions of the trailer. You will also find a unique combination of aluminum cylinders and stainless steel screws in this popular model. This is best used with our 3-care CS headramp. The CX-7MST was adapted from the CX-6MST to create a 7 car trailer by adding a deck over the tandem.

## SPECS

Capacity	Nine (9) Vehicles
Length	45' 6"
Width	102 inches

## Standard Features

- Two (2) Year Structural Warranty
- Aluminum Track Sheets Tandem Hose and Valve Covers
- Quick Release Ratchet System for Straps
